LETTER OF RECOMMENDATION

May 24, 2015

RE: Modern Nuclear

To Whom It May Concern:

Modern Nuclear has been a provider of mobile nuclear medicine diagnostic services to our Health Scan Imaging network for over six months, commencing in the fall of 2011. From our first meeting, I was very impressed with the variety of cost-effective and scalable options the Modern Nuclear team brought to the table. During the “vetting process”, when we were evaluating the suitability of Modern Nuclear relative to their competitors, the proposal put forth by Modern Nuclear was superior to the others by every metric, especially image quality, affordability and flexibility.

The administrative staff of Modern Nuclear was particularly helpful in advising our staff on how to optimize many aspects of our service, including scheduling, ensuring timely availability of radiopharmaceuticals and providing ancillary imaging equipment, sometimes on short notice.

Upon initiation of our contraction agreement with Modern Nuclear, their team was able to help us land and maintain a local contract with a managed care entity.

The technologists provided with the mobile unit we utilized from Modern Nuclear were knowledgeable, polite, well groomed and very cooperative with our staff. In summary, our experience with Modern Nuclear has been uniformly positive and without reservation we recommend their services to any entity in need of short-term or long-term mobile nuclear medicine services.
